## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Ohgoda et al (US 5,025,156).

Regarding claim 1, Ohgoda discloses a storage phosphor reader, comprising a receiving station (10) adapted to receive a cassette (2) containing a removable storage phosphor (1); a path (50) along which the storage phosphor is transportable in a first (A1) and second (A2) direction when removed from and returned to the cassette, the receiving station being disposed at one end of the path, and an access area disposed at the other end of the path wherein the access area can be exposed to light as the storage phosphor is transported along the path (See Generally Fig. 1 and col. 4, lines 13-19, col. 5, lines 3-6 and col. 6, lines 16-48).

### ***Allowable Subject Matter***

3. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter:

Regarding dependent claim 2, the prior art, as stated supra, does not disclose or fairly suggest of storage phosphor reader wherein the access area of the apparatus comprises a cover.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
